* Grants Given from 1994-Present	21

(Note: this Fact Sheet contains important information about the Mother-To-Mother Fund. Any chapter considering requesting a grant should read the <u>entire</u> Fact Sheet (pages 1-21) to best understand the kind of requests the Committee can approve. If you have any questions about the information here, please contact your Regional or Conference Coordinator.

Information on specific grants is given so members know how the money they have donated to the Fund has been used in grants. Each grant request is considered individually. All future grants will be considered based on the facts in that grant request and the money available in the Fund, not on past grants given. No past grant should be construed as a guarantee that a similar situation will warrant a grant in the future, because specific information between the grant situations may vary greatly. "Similar" sounding situations may be very different in details that cannot be included here because of space considerations.)

# INTERNATIONAL MOMS CLUB'S MOTHER-TO-MOTHER FUND

#### **History of the Fund**

Since the MOMS Club began in 1983, natural disasters have struck very close to our mothers. There have been devastating snowstorms in the Northeast, hurricanes in Florida, the Eastern Seaboard and the Gulf Coast, tornadoes in Texas, Indiana and Ohio, floods all across the Plains and Midwest, and fires in the South and West.

Although we have local MOMS Club chapters in all those areas, in our first 11 years, no members were seriously affected by those natural disasters. We were very lucky.

On January 17, 1994, at 4:31 AM, we were not so lucky. A major earthquake struck the Los Angeles area, destroying homes, schools, malls and freeways in the San Fernando and Simi Valleys. And that wasn't all. Aftershocks continued — in the first week there were over 1,000 aftershocks! Some homes which had escaped damage in the first quake, suffered extensive damage in later ones. Everyone who lived within the quake area lost possessions, but some people lost their homes and everything they owned.

No more had the dust settled after the first earthquake, than the International MOMS Club Coordinators began receiving calls from chapters in other parts of the country asking, "Were any MOMS Club mothers hurt? What can we do to help?"

We did a rapid survey of the local chapters in the affected area and confirmed that none of our 1,375 Southern California families living there at the time suffered loss of life. However, at least six families from two chapters, Simi Valley and Chatsworth/Northridge, had major damage to their homes, some of which made their homes "red-tagged" or uninhabitable. One family fled their quake-demolished apartment through a second-floor window with only their nightclothes on their backs. They were not allowed to return to their home for safety reasons for several weeks. By the time they were allowed to retrieve their things, thieves had stolen everything they owned.

As soon as the news about those six families was shared with our sister chapters across the country, the caring telephone calls were transformed into donations. Our Founder and Chairman, Mary James, set up the Mother-To-Mother Fund® to handle those donations and to distribute them to the needy MOMS Club families.

("MOMS Club," "Mother-To-Mother Fund," and the Mother/Children logo are registered service marks of the International MOMS Club.) (Updated: 11-2022)

Because it is too difficult in a time of disaster to coordinate clothing sizes and household needs, and because most of the families suffered losses that only money could help, it was decided the Mother-To-Mother Fund would only handle monetary donations. That way, the families could use the money for whatever needs were most pressing at the time — whether it was to get clothing, household items or shelter.

In the months after the Earthquake, \$4,235.00 was contributed for the Southern California mothers-in-need and that entire amount was donated to the six members who applied for assistance. Some of those members said that the help given them by the Mother-To-Mother Fund was the best help they received because, even though it took several months for us to collect the final donations, the distribution still came before government and Red Cross assistance. Thanks to their sister MOMS Club members' caring, those mothers were able to make a quicker start on their new lives.

In the year after the Earthquake, MOMS Club members experienced additional near-misses with natural disasters, including devastating wild fires, hurricanes, flooding, blizzards and still more tornadoes. With the thought that the Fund is of the most use if it is available before a disaster strikes, Ms. James decided to keep the Fund open so chapters could continue to donate to it in an ongoing way. This way, the Fund can provide emergency assistance practically immediately. We hope the Fund will be ready whenever a natural disaster strikes.

In 1996, several chapters asked if the purpose of the Mother-To-Mother Fund could be expanded to help mothers with devastating personal emergencies as well as natural disasters. Acting on that request, Ms. James asked the local chapters about the idea of expanding the purpose of the Fund. The universal response was, "Yes!" Now the Fund is also available to help mothers suffering devastating personal emergencies, such as abandonment, the need to flee an abusive spouse, help after the death of a spouse or severe accident, and assistance during a child or member's life-threatening illness.

The Fund cannot take the place of other emergency assistance, such as insurance, state assistance and social service agencies, and it cannot replace the traditional personal support from chapters, like bringing meals or providing babysitting. With any devastating personal emergency, there must be a significant, long-lasting loss to the member's family that was not caused by their actions. (For more information about the need requirements for a grant, see the "How to Request Help..." and the "When a Request Must Be Declined" sections of this Fact Sheet.)

In some cases of extreme need, in addition to direct grants to member families, the M2M Fund can also be used as a collection point for donations designated for particular families-in-need. This is only allowed in cases where a grant has already been approved by the Fund, and when the nature of the family's need is recognized as being something that would warrant collecting contributions from other chapters, in addition to the member's own chapter. This allows for a greater total amount of assistance to the family-in-need in extremely dire circumstances.

To give you an idea of what might qualify as an extremely dire circumstance, here are two situations when the Fund has collected additional donations earmarked for specific families:

The first use of the Fund for additional donations for a personal emergency came when a Tennessee member died suddenly after giving birth to twins. The mother's chapter helped the family by babysitting their

older child, bringing meals, collecting baby clothes and diapers, and by rocking the babies in the hospital. A grant of \$900 was given from the Mother-To-Mother Fund and local chapters donated an additional \$809.50 to the Fund specifically for this family, making the total grant amount \$1,709.50 given via the Fund to help this family transition to having an at-home father.

Another use of the Fund for additional donations was after the tragedy of the terrorist attacks on September 11, 2001. Four of our mothers lost their husbands that day – three in the collapse of the World Trade Center and one in the Pentagon. Three of the mothers were pregnant at the time of the attack. The Mother-To-Mother Fund gave an immediate \$5,000 grant for emergency living expenses to <u>each</u> of the four mothers – grants made possible by donations already in the Fund at the time of the attack.

Over the next several months, in addition to many local projects to benefit the many other victims of the terrorist attacks, 160 chapters and Coordinators did projects on their own specifically for our four mothers. Those donations specifically for the 9-11 moms enabled the Mother-To-Mother Fund to send them each an <u>additional</u> grant of \$10,160.

As in the cases above, for additional donations to be earmarked for a specific member-in-need, there first must be a grant approved from the general Mother-To-Mother Fund. After that point, in certain extreme circumstances, the Fund will offer to collect donations from other chapters specifically for that member-in-need. The chapter must designate that family as the intended recipient of their donation at the time they send the contribution to the Fund.

The Fund will collect the donations for the family from all chapters contributing, and make one additional grant of the donated amount to that family. Designations of recipients may only be made by the chapter at the time they make their donation to the Fund and not all grant recipients are eligible for this additional assistance, so check with the M2M Fund Committee before sending any donations specifically for a particular family.

(If your chapter has a member-in-need who does not receive an M2M grant or who is not eligible for the additional collection of donations through the Fund, your chapter may still do local fundraisers to benefit your member-in-need. Discuss the situation with your Regional Coordinator before conducting any fundraisers for a chapter member to make sure your chapter follows all IRS nonprofit rules.)

A list of all the grants given to date is included in this Fact Sheet packet. All of the family situations were extremely grave. You will notice that there have been no grants to assist with birth defects, genetic illnesses, funerals, divorce or unemployment, without other mitigating factors. We can only help with problems in a member's immediate family (the member, her husband, her children living at home). We cannot help with situations that involve extended family problems (a member's father, mother, sibling, in-laws, children living elsewhere or on their own, etc.), even if their problems impact the member's family, too.

Because the amount in the Fund is limited and there are 100,000+ MOMS Club families – with an estimated 360,000+ family members! – it is not possible for the Fund to assist in situations like the ones explained in the paragraph above, even though we know they are very difficult for the families involved. Instead, we must concentrate on only the most serious, unexpected, devastating events in a member's immediate family. As you'll see from the list of grant recipients, the money donated by the chapters to the Fund has helped members in a most significant way when faced with devastating personal or natural disasters.

We hope chapters will remember the Mother-To-Mother Fund and their sister members around the world as they plan service projects, or when they look at their chapter treasuries and realize they have a bit more tucked away than their chapter truly needs.

We don't know what the future holds. We hope that each chapter will be there for their own members, and, working together, we hope that the Mother-To-Mother Fund will always be available to give an extra boost to those unfortunate members who have been hard hit by natural or unexpected devastating personal disasters.

### DONATING TO THE MOTHER-TO-MOTHER FUND!

The Mother-To-Mother Fund depends on donations from local chapters. If there are no donations, then there will not be money available to help in an emergency.

For the Mother-To-Mother Fund to have money when grants are needed, that money must first be donated by the chapters!

Because the Fund depends on the chapters' support, when the decision is made on the amount of a grant, the Committee does take into consideration the amount of support a chapter has given the Fund in the past. If a chapter has not contributed to the Fund and requests a grant for a member, the request may be turned down by the Committee based on the chapter's non-support of the Fund in the past.

Likewise, if a chapter has supported the Fund in the past and throughout the years, the Committee will take that into consideration. All chapters need to remember, though, that the Committee cannot give a grant if the member's situation does not fit the requirements of the Fund.

Also, the chapters must remember that the Fund is not a bank, where money donated by an individual chapter is stored and made available solely for their members' needs. Instead, the Fund operates on the premise that if everyone contributes to the Fund as they can, the Fund will be available to those who need it, when they need it.

If a member's need fits the Fund's requirements, the amount of assistance we are able to give at any time depends on both the need of the member at the time of the request, <u>and</u> the generosity of the local chapters *before* the grant is requested.

Through the years, the chapters' support of the Fund has increased along with our membership, so we have been able to give more substantial grants than in the beginning, even for the same reasons. The amount of money in the Fund at the time of the grant request and the potential other needs for that money by other members-in-need in the near future, will always be considered in the determination of the amount of a grant.

To do their part in keeping the Mother-To-Mother Fund supplied with grant money, some chapters plan specific fundraisers to help the Fund each year. Others contribute extra money from their treasury on a regular basis. Some chapters have donated small amounts, several times during the year; other chapters have sent checks for many hundreds – even thousands – of dollars at a time. In all cases, the contributions have made a real difference in the lives of MOMS Club members-in-need who were not even known at the time of the donations.

Each chapter and individual donor who contributes to the Mother-To-Mother Fund directly will receive a letter acknowledging their donation. That letter is their receipt.

Also, each year, the chapters which have contributed to the MOMS Club Mother-To-Mother Fund will receive certificate recognitions of their support. These certificates are usually presented at President Workshops in the late summer or fall, or at State or Regional Luncheons in the fall or spring.

The IRS requires that we collect and provide to them identifying information for any individual donor of \$5,000 or more, and is considering lowering that reporting threshold. This information is only collected and given to the IRS because of their reporting requirements, and the International MOMS Club will comply with all IRS requirements at all times.

Support of the Fund is considered in choosing the MOMS Club Outstanding Chapters each year. A chapter must contribute to the Mother-To-Mother Fund to be recognized as a MOMS Club Outstanding Chapter for that year. For more information about the Outstanding Chapter recognitions, contact your Regional Coordinator.

We know from past hurricanes, floods, blizzards, tornadoes and earthquakes, that natural disasters come when you least expect them and that terrorists thrive on being unpredictable. We also know that, no matter how hard a family tries to make careful choices and to save a nest egg for their future, tragedies and personal emergencies that no one could prepare for or expect can happen to the best of us.

When the worst does happen, we hope that no MOMS Club member ever has to face a devastating emergency on her own. Instead, by standing together, both in our local chapters and on the International level with the MOMS Club Mother-to-Mother Fund, we hope to be there, ready to give a helping hand to any of our mothers suffering from devastating personal financial or natural emergencies.

<u>To contribute to the Fund, donate online here:</u> https://momsclub.org/m2m-fund/m2m-donation/

OR send a check, payable to "Mother-To-Mother Fund" to:

Mother-To-Mother Fund International MOMS Club 208 Hewitt Dr., Ste 103 #328 Waco, TX 76712

Be sure to put your chapter's complete name on your check -- including state/province! (And your country, if you are outside the United States.)

## HOW TO REQUEST HELP FROM THE MOTHER-TO-MOTHER FUND®

The Mother-To-Mother Fund is not designed to replace the individual and personal help that a chapter can offer its members-in-need. Therefore, the first thing any chapter must do when they have a member with an emergency is determine what help the *chapter* can offer the member *first*.

The type of help a member may need will depend on the type of emergency she is experiencing. Not all emergencies require money to help. Many families need babysitting, meals or groceries, carpooling, clothing/toys/household items, help applying for government services, or even a friendly ear, far more than they need cash contributions.

When an emergency hits that can only be eased by money, the chapter should again see first what they can do to help. Many chapters plan fundraisers specifically to help a member-in-need, and such a fundraiser is an appropriate use of chapter time and effort. Two examples of chapter fundraisers for needy members in the past include a barbeque to raise money for a member's child who needed a kidney transplant, and a restaurant fundraiser & raffle for a family whose husband was being treated for brain cancer. In both of those cases, the chapters also had been providing extensive babysitting and bringing meals.

If additional help is needed for the family, then the chapter's president should use the online form to request a Mother-To-Mother Fund grant. Be sure to include information on what emergency the family is experiencing, the family's situation (their general financial state and whether insurance will cover any or all of the situation), and what they need the most (how the grant will be spent). Because the Committee always confirms the information, the member-in-need's name, address and telephone number must always be included.

It is important that <u>before</u> you submit your request, you ask the member-in-need if she would be willing to receive assistance from the Fund. Some families are very private and do not want "outsiders" knowing of their problems. In those cases, the family's privacy must be respected.

Also, although we do not directly publicize a grant recipient's name, we do share with the chapters the recipient's home state, the situation and the amount of the grant. Also, the IRS requires that we report the names and addresses of all grant recipients. Because of that, it is likely that people who know her will be able to identify that she has received a grant and how much it was. If she is not willing to have that information known, we cannot award a grant.

A chapter should only request a grant on behalf of a mother-in-need if they think her situation fits the requirements of the M2M Fund and if they think that she is truly deserving and needing a grant. The chapter's evaluation of the mother's situation is the first-line in our consideration. If a chapter does not think that the situation fits the Mother-To-Mother Fund requirements or that the mother's situation is not needy enough to warrant their endorsement, they should <u>not</u> submit her name and situation.

If the family is open to help from the Mother-To-Mother Fund and the chapter feels that the member's situation deserves to be considered for a grant, the chapter's request will be forwarded to the International MOMS Club's Mother-To-Mother Fund Committee. If there is no committee at the time of the request, then the International Board of Directors will act as the committee. Each request will be considered individually. Although the information submitted by the chapter must include the name and address of the member-in-need, the Committee/Board will consider the request "blind" to the identity of the MOMS Club member, so all requests will be considered fairly.

Decisions on whether a grant will be made to the member-in-need and how much the grant might be will be based on a variety of factors. Those factors include:

- \* The member's need;
- \* The circumstances/situation leading to that need;
- \* The chapter's support of the Fund in the past;
- \* And the amount of money available in the Fund at that time.

All requests for grants are considered very carefully. The chapter may be asked additional questions to help determine the member's need, financial situation or other factors. The Committee will ask any additional questions to the chapter, which should answer them either with information from first-hand knowledge or by asking the member-in-need. The member-in-need should not be asked by the chapter to correspond directly with the Committee – all questions and answers should go through the chapter. If the chapter has any doubt about the completeness or truth of any answers given them by the member, they must share their concerns with the Committee.

All decisions by the Committee shall be final.

Any money given by the Fund to a member-in-need should be considered a <u>one-time</u> grant. Because it is a grant, the member does not need to repay the M2M Fund or the MOMS Club. Each grant is given for a specific purpose, but the member may use the grant for whatever purpose she feels is the most pressing for her family at that time. However the money is used, any applicable taxes are the responsibility of the recipient and she should take those taxes into consideration before the money is spent.

The identity of any recipients will not be directly publicized, but the general situation, grant amount and state of residence will be made available to the members and chapters so they know how their contributions have been used. It will be possible for someone familiar with the recipient's family to discern her identity from that information, even though the International MOMS Club does not publish the name of the recipient.

If a recipient wishes complete privacy without any identifying information being made available to the members, then she must not accept the grant. We respect the recipients' privacy by not publishing their names, but it is imperative that the members know how their donations have been used. Also, the IRS requires that we report the names of the recipients, their addresses and grants each year. Therefore, we cannot guarantee confidentiality concerning the identity of a recipient.

#### Should your chapter ask for a grant?

It's important to remember that the Mother-To-Mother Fund cannot give grants unless the mother-in-need's situation fits in the parameters of the Fund. Many situations are truly needy and may be devastating, but they may still not fit in what the Fund may help with.

Some points to remember about the Mother-To-Mother Fund and how the Committee is <u>required</u> to make its decisions are:

- \* We can only help in truly <u>devastating</u> situations. Natural disasters get special priority, even if they are not devastating, but any personal situation must be a <u>devastating</u> financial situation to be considered. A situation may be emotionally or mentally devastating, but we cannot help with those, even though we do sympathize with the mother. The only personal catastrophes that we can help with are those that are financially devastating;
- \* A grant request must come from a chapter or from a Coordinator. <u>A grant request must not come directly from the member-in-need to the Coordinator or the Committee</u>. If a chapter does not think that a member should be given a grant, they should NOT submit a grant request. Only submit requests that you think do warrant a grant;
- \* We cannot give anonymous grants. Although we do not directly publicize the recipients of the grants or the amounts a person receives, often a chapter's members will be able to figure out how much of a grant was given to one of their members. If the member wishes to remain anonymous or keep her grant secret, we cannot consider the grant request and it will be declined automatically;
- \* Do not ask for a grant at the beginning of a problem. Many, many families have financial problems. Times and circumstances can be very difficult, but that does not mean that a grant should be asked for or given. A situation must be truly devastating, not just difficult. First try local services to help the family, then go to the Mother-To-Mother Fund when all else fails. We are not a first-line assistance... we're a last ditch assistance when everything else has failed or fallen through the cracks. For example, a grant for a missed mortgage payment will certainly be turned down, while a grant for emergency living expenses for a family that has already lost their home or who is being evicted from rental property will more likely be granted, if the circumstances that led to their situation arose from medical problems or other problems that were beyond their control;
- \* A grant is not guaranteed. The Committee decides, after considering all the circumstances. Do not promise a grant to your mother-in-need when finding out if she would be interested in your applying for a grant for her. If the Committee gives a grant, they contact the mother directly and tell her how much the grant will be and when to expect it;
- \* If a chapter has supported the Fund over a long period of time, that will be considered in the decision of how MUCH of a grant will be given, but it will not influence the Committee to give a grant if the situation does not qualify. By support of the Fund, we mean that the chapter has donated to the MOMS Club Mother-To-Mother Fund on their own over the years (not just once), outside of inter-chapter activities like Luncheons. Recent donations will be considered more favorably than donations several years ago;

- \* The Mother-To-Mother Fund is not a bank. The grants are not given *because* a chapter has donated grants are given only if the circumstances fit our parameters and are truly devastating. As explained above, the amount of a grant may vary depending on a chapter's support. Although it has never happened so far, if there is not enough money in the Fund to help all the mothers currently being considered, then there may have to be a choice between requests from chapters that have supported the Fund and those who have not, but a chapter must not look at the Fund as a bank and think that because they've donated \$X amount, that they are entitled to \$X amount back in a grant. Some chapter's members have received far more than ANY chapter has donated to the Fund. Others have received less. The impartial M2M Committee has to take on the burden to decide if a grant will be given and if so, how much;
- \* The Mother-To-Mother Fund cannot replace insurance. We have been astounded how few families have life or medical insurance. Yes, insurance is expensive, but to not have any insurance is like gambling with your family's future. You may not need it, but if you do... The Mother-To-Mother Fund will never have enough donations to act as insurance for all our 100,000+ members and their families. We do ask if a family has insurance when gathering information about a grant request, but we do not favor those who do not have insurance, because we cannot fill that niche. Instead, we only take into consideration how much a family's insurance is covering to help determine the financial need of the family at that time. If insurance is taking care of the family's medical expenses, for example, then the family may not need a grant or may need a grant for other reasons. If insurance is taking care of some of the family's needs during a devastating emergency, then we might be able to help with the other needs, but we need to know the extent of the emergency and financial impact on the family before we can determine if a grant can be given or the amount of the grant;
- \* All grants are one-time-only grants from the Fund. Sometimes mothers-in-need have received additional grants when additional donations designated specifically for them are received later by the Fund. The Fund will only accept donations for mothers who have already received grants from the Committee, and in general, unless the situation is so overwhelming that other chapters are inspired to help, the Fund does <u>not</u> normally collect additional donations. We have only used the Fund for additional donations in four instances: the 1994 California Earthquake, when a mother died giving birth to twins, when a mother suddenly died of a brain tumor, and for the 9-11 mothers. If a member-in-need's situation would warrant additional donations, then normally a trust fund is set up by her community, not the M2M Fund, so we discourage additional donations that are designated for specific mothers being sent to the Fund, and instead, encourage chapters to support the family through local resources;

\* Whether or not a grant is approved by the Mother-To-Mother Fund, a chapter <u>may</u> do fundraisers to help a member-in-distress. Before you help a member directly, though, be sure to talk over the situation with your Regional Coordinator. You need to be very careful that the membership as a whole is in support of helping the member, and you need to make sure that you do not violate any IRS nonprofit laws in making your donation directly to the member-

in-need. You may wish to contact a tax or legal professional before making any donations directly from the chapter to a specific member-in-need, and remember that you need a vote of the general chapter at a business meeting before any donations can come from the chapter treasury and before the chapter name can be used in raising funds for any purpose;

\* If significant amounts of money are to be collected by your chapter for a member-in-need, you will need to consult with financial and legal advisors in your community to make sure you follow

all local, state and national tax laws. There may be legal limits on the amount of financial assistance a chapter may give any individual.

Also, any chapter with more than \$50,000 income in any fiscal year must file additional forms with the IRS. The filing amount is lower in many states -- \$25,000. Check with your state for the specifics there. Any fundraisers where the money is earned by the chapter and placed in the chapter accounts <u>is</u> considered part of a chapter's yearly income, even though the money is not *for* the chapter. Therefore, we suggest that any chapter doing significant fundraisers for a member-in-need do it through a community charity or with the assistance of a local bank to set up a trust fund for that family, so any donations from the community would be made directly to the trust fund, not funneled through the chapter;

- \* We have 100,000+ mothers in the MOMS Club local chapters. Including their immediate families, the Mother-To-Mother Fund is responsible for more than 400,000 individuals. If we were to include the extended families, there would be <u>over two million people</u> who could expect grants from the Mother-To-Mother Fund. Therefore, the Committee has to be very, very careful that any grant request considered be one that would be offered to ANY MOMS Club member in a similar situation;
- \* We will not give a grant to keep a mother in harm's way. Therefore, we do <u>not</u> give grants to mothers in abusive situations unless they have fled their abuser and are starting a new life in a new location where the abuser cannot find her. Even then, the grant is not given because of the abuse, but because of the financially devastating situation of starting anew without the resources, clothing, toys, household goods, etc., from their former life.

#### Information Needed in All Requests:

If you understand the parameters above, and think that the memberin-need in your chapter fits the type of situation that the Mother-To-Mother Fund was designed to help, please <u>do</u> request a grant for her from the Mother-To-Mother Fund!

To request help from the Mother-To-Mother Fund, submit the online form on the website: <a href="https://momsclub.org/resources/m2m-grant-request/">https://momsclub.org/resources/m2m-grant-request/</a>. We prefer to receive requests through the form because they can be more easily and quickly shared with the Committee. Be sure to have the following information on hand before you begin:

- 1) Your name, title, address, telephone number and email address. Requests are normally submitted by the chapter president, after the board has confirmed that the member's need exists and will vouch for the information and situation. If the request is not being submitted by the president with the board's approval, include an explanation of why.
- 2) Member-in-need's name, address, telephone number, and how long she's been in the chapter. Her need must have occurred after she joined the chapter. We cannot give a grant for a mother whose need arose from something that happened before she joined the chapter. If there were any circumstances before she became a member that impacted on her situation now, please include that information.

- 3) <u>A description of the member's situation.</u> What happened, how did it happen, why did it happen? What is she or her family doing to make the situation better?
- 4) What is her financial situation? Do they have insurance? How much? Do they have savings? Are they already getting help from family? What is their overall financial situation? Do not presume that a devastating emotional situation means they have a devastating financial need. Do not presume that because they are having a financially difficult time, that it is a financially devastating time. Although it is awkward, you must ask the family if they need the financial help, how much and why. The M2M Committee may ask for the family's income. This is not to be invasive. This is only to help evaluate the need.
- 5) A list of her most pressing needs at this time. What would the grant be spent for?
- 6) A description of how the chapter has helped the mother. What has your chapter done to help her? What will you be doing in the future?
- 7) <u>Has the chapter requested a grant for this mother in the past?</u> Include information about that grant request. Was the grant granted? If it was declined or withdrawn, why?
- 8) <u>Has your chapter supported the Fund in the past?</u> Greater emphasis will be given for chapters who have supported the Fund recently and repeatedly.
- 9) Any other information positive or negative that would be helpful to the Committee. We are relying on you and your chapter to confirm all information and to give us the background we need to fairly consider the request. Do not be embarrassed to ask the member for financial information and do not withhold any information that might help the Committee make a decision quickly and fairly. The more information the Committee must ask for, the longer it will need to make a decision on the grant request.

The Regional Coordinator will forward your request to the Mother-To-Mother Fund Committee for consideration. Preliminary answers or additional questions are usually returned to the chapter within two-to-three days. Holidays may slow that process some because our volunteers may not be online.

You may ask your Regional Coordinator for confirmation that she has received your chapter's grant request and that the Committee is considering it. If you do not receive confirmation from your Regional Coordinator within a day or so of your asking for it, email us at the support @MOMSClub.org address:

In the subject line, put "M2M Fund" <u>and</u> your chapter's name/state. In the body of the email ask for confirmation that the Committee is considering the request you previously submitted.

All communications will be between the chapter president, the RC and the Committee. We do not release information on specific grant requests beyond that in order to maintain the privacy of the mothers-in-need.

<u>If asked</u>, we will notify a chapter if a grant has been given, but we will not tell the specific amount. The mother-in-need may tell her chapter how much the grant was for, but she is not required to do so.

All grants given will be included on the list of grants available from the International MOMS Club each year. That list will not include the members-in-need's names nor addresses, but it will include the state of the recipient, the general situation/need, and the amount of the grant.

# WHEN A REQUEST MUST BE DECLINED...

Nothing is harder for the Mother-to-Mother Fund Committee than when a request for assistance must be declined.

The Committee considers each request very carefully, and always from the point of view of trying to see if the request can possibly fit the parameters of the Funds requirements.

We know that a chapter only submits a grant request when they feel the mother is both needy and deserving of a grant.

Even so, there are some requests that must be turned down because they do not fit the kind of situations that the Mother-To-Mother Fund is allowed to assist.

That a request is turned down does not mean that the mother is not needy. It does not mean that the Committee did not find her deserving of a grant. In all cases where the Committee has had to decline a grant request, the reason has been that the request has either been for a purpose that the Fund cannot help or there have been mitigating factors that put the request outside the limits of what the Fund can help.

At any given time, the MOMS Club has over 100,000 members. Each of those members represents a family, so there are more than 400,000+ MOMS Club family members under our Mother-To-Mother Fund umbrella.

Although, so far, the Fund has always been able to make a grant when needed, that ability to make a grant depends on the amount of money in the Fund at any given moment. It also depends on how many other mothers can be reasonably expected to have the same or similar needs in the future. It would not be fair to give a grant for a specific reason to one mother and then not give a grant to another mother in the same circumstances.

Therefore, there are some situations that we cannot give grants for, because there are simply too many mothers in our organization who are likely to have the same needs in a given year and the Fund just cannot afford to give grants to them all. Because of that, the Fund simply cannot support some types of requests – specifically, we cannot help funerals, divorce, or most birth defects, no matter how needy the mother's family may be.

There are other types of requests that we cannot grant because the mother-in-need or her family did something to help the bad situation happen – or they did not do something to stop the bad situation from happening. With so many mothers in our organization, and only a limited amount of funds in the Mother-To-Mother Fund, we must make sure that grants are given only to families who have not contributed to their problems.

Also, the Fund was started to help families facing unbearable financial burdens outside the normal ups and downs of the economy. Therefore, we cannot extend the Fund to help with business setbacks or unemployment. Unemployment may be considered if there are other reasons for requesting a grant, but unemployment alone is not reason for a grant.

# Here is a list to help clarify the kind of situations that are beyond the Fund's ability to help. Although we don't like to list things in the negative, we cannot help with:

- \* Divorce:
- \* Abusive situations (unless the mother has fled the husband and is starting over somewhere else in hiding, in which case, the grant is given for starting over with nothing, not for the abuse);
- \* Funerals:
- \* Trips to Funerals;
- \* Creating memorials to deceased relatives or children;
- \* Bankruptcy;
- \* Bad business situations;
- \* Unemployment (although unemployment is considered if a grant is requested for something else like a medical problem we cannot give grants for unemployment although we know it does create financial difficulties);
- \* Any situation that the family helped bring upon themselves;
- \* Any needs that arise from situations in the member's extended family, instead of her immediate family. (An immediate family is defined as the member, her spouse and their children living at home. We cannot help with a situation arising from a problem originating with a member's parents, siblings, in-laws, or children living elsewhere or on their own.);
- \* If the situation is not truly financially <u>devastating</u>. To be devastating, it must have been lasting for a significant period of time, and, despite the family's best efforts, it must be financially devastating enough to not be recoverable from in the foreseeable future.

(The Committee reserves the right to add other reasons in the future, but at the time of this Fact Sheet, these are the primary reasons why grants have been declined.)

# <u>Some other points to remember about the Mother-To-Mother Fund and how</u> the Committee is **required** to make its decisions are:

- \* We can only help in truly <u>devastating</u> situations. Natural disasters get special priority, even if they are not devastating, but any personal situation must be a <u>devastating</u> financial situation to be considered. A situation may be emotionally or mentally devastating, but we cannot help with those, even though we do sympathize with the mother. The only personal catastrophes that we can help with are those that are financially devastating;
- \* To help determine if a situation is one that we can help with, ask yourself the following questions: Is this a true emergency or personal disaster? Is there any significant, long-lasting loss? Is the situation something out-of-the ordinary? Or is it one of the many trials that families may have to face at some time in their lives? Is this something that a family's normal planning could have prevented or provided for? Has the family exhausted all the aid available from the government or other social service agencies? If your answers are "yes, yes, yes, no, no, yes," then the situation might fall within the M2M Fund's ability to help;
- \* A grant request must come from a chapter or from a Coordinator. A grant request should not come directly from the member-in-need. If a chapter does not think that a member should be given a grant, they should NOT send the proposal to us. Only send us proposals that you think do warrant a grant;
- \* We cannot give anonymous grants. Although we do not directly publicize the recipients of the grants or the amounts a person receives, often a chapter's members will be able to figure out how much of a grant was given to one of their members. If the member wishes to remain anonymous or keep her grant secret, we cannot consider the grant request and it will be declined automatically;
- \* Do not ask for a grant at the beginning of a problem. Many, many families have financial problems. Times and circumstances can be very difficult, but that does not mean that a grant should be asked for or given. A situation must be truly devastating, not just difficult. First try local services to help the family, then go to the Mother-To-Mother Fund when all else fails. We are not a first-line assistance... we're a last ditch assistance when everything else has failed or fallen through the cracks. For example, a grant for a missed mortgage payment will almost certainly be turned down, while a grant for emergency living expenses for a family who has already lost their home or who is being evicted from rental property will more likely be granted, if the circumstances that led to their situation arose from medical problems or other problems that were beyond their control;
- \* A grant is not guaranteed. The committee decides, after considering all the circumstances;
- \* If a chapter has supported the Fund over a long period of time, that may be considered in the decision of how MUCH of a grant will be given, but it will not influence the Committee to give a grant if the situation does not qualify. By support of the Fund, we mean that the chapter has donated to the

MOMS Club Mother-To-Mother Fund on their own over the years (not just once), outside of interchapter activities like Luncheons;

- \* The Mother-To-Mother Fund is not a bank. The grants are not given *because* a chapter has donated grants are given only if the circumstances fit our parameters and are truly devastating. As explained above, the amount of a grant may vary depending on a chapter's support. Although it has never happened so far, if there is not enough money in the fund to help all the mothers currently being considered, then there may have to be a choice between requests from chapters that have supported the Fund and those who have not, but a chapter must not look at the Fund as a bank and think that because they've donated \$X amount, that they are entitled to \$X amount back in a grant. Some chapter's members have received far more than ANY chapter has donated to the Fund. Others have received less. The impartial M2M Committee has to take on the burden to decide if a grant will be given and if so, how much;
- \* The Mother-To-Mother Fund cannot replace insurance. We have been astounded how few families have life or medical insurance. Yes, insurance is expensive, but to not have any insurance is like gambling with your family's future. You may not need it, but if you do... The Mother-To-Mother Fund will never have enough donations to act as insurance for all our 100,000+ members and their families. We do ask if a family has insurance when gathering information about a grant request, but we do not favor those who do not have insurance, because we cannot fill that niche. Instead, we only take into consideration how much a family's insurance is covering to help determine the financial need of the family at that time. If insurance is taking care of the family's medical expenses, for example, then the family may not need a grant. If insurance is taking care of some of the family's needs during a devastating emergency, then we might be able to help with the other needs, but we need to know the extent of the emergency and financial impact on the family before we can determine if a grant can be given or the amount of the grant;
- \* All grants are one-time-only grants from the Fund. Sometimes mothers-in-need have received additional grants when additional donations designated specifically for them are received later by the Fund. The Fund will only accept donations for mothers who have already received grants from the Committee, and in general, unless the situation is so overwhelming that other chapters are inspired to help, the Fund does <u>not</u> normally collect additional donations. We have only used the Fund for additional donations in five instances: the 1994 California Earthquake, when a mother died giving birth to twins, when a mother suddenly died of a brain tumor, for the 9-11 mothers and when a mother lost her husband and children in a devastating house fire. If a member-in-need's situation would warrant additional donations, then normally a trust fund is set up by her community, not the M2M Fund, so we discourage additional donations that are designated for specific mothers being sent to the Fund, and instead, encourage chapters to support the family through local resources;

\* Whether or not a grant is approved by the Mother-To-Mother Fund, a chapter <u>may</u> do fundraisers to help a member-in-distress. Before you help a member directly, though, be sure to talk over the situation with your Regional Coordinator. You need to be very careful that the membership as a whole is in support of helping the member, and you need to make sure that you do not violate any IRS nonprofit laws in making your donation directly to the member-

in-need. You will need to contact a tax or legal professional before making any donations directly from the chapter to a specific member-in-need, and remember that you need a vote of the general chapter at a business meeting before any donations can come from the chapter treasury and before the chapter name can be used in raising funds for any purpose;

- \* If significant amounts of money are to be collected by your chapter for a member-in-need, you will need to consult with financial and legal advisors in your community to make sure you follow all local, state and national tax laws. There may be legal limits on the amount of financial assistance a chapter may give an individual. Also, any chapter with more than \$25,000 income in any fiscal year must file additional forms with the IRS. Any fundraisers where the money is earned by the chapter and placed in the chapter accounts is considered part of a chapter's yearly income, even though the money is not *for* the chapter. Therefore, we suggest that any chapter doing significant fundraisers for a member-in-need do it through a community charity or with the assistance of a local bank to set up a trust fund for that family, so any donations from the community would be made directly to the trust fund, not funneled through the chapter;
- \* We have 100,000+ mothers in the MOMS Club local chapters. Including their immediate families, the Mother-To-Mother Fund is responsible for more than 400,000 individuals. If we were to include the extended families, too, there would be <u>over two million</u> people who could expect grants from the Mother-To-Mother Fund. Therefore, the Committee has to be very, very careful that any grant request considered be one that would be offered to <u>any and all</u> MOMS Club members in similar situations:

\* We will not give a grant to keep a mother in harm's way. Therefore, we do <u>not</u> give grants to mothers in abusive situations unless they have fled their abuser and are starting a new life in a new location where the abuser cannot find her. Even then, the grant is not given because of the abuse, but because of the financially devastating situation of starting anew without the resources, clothing, toys, household goods, etc., from their former life.

#### Requests that have been declined:

The following situations were turned down for grants from the Fund. We realize that many of these situations are heart-wrenching and very difficult for the families, but they did not meet the grant criteria for the Mother-To-Mother Fund. We offer them here to help you understand what kinds of situations we cannot help with:

- \* Flooding of a member's *parents'* house;
- \* A college fund for children of a member who died;
- \* Treatment programs for an autistic child (emotionally devastating and financially life-changing, but not financially devastating);
- \* Investment in a member's husband's failing business;
- \* Damage to a member's house when rain fell during a do-it-yourself re-roofing project (although the damage was significant, insurance covered virtually everything, so there was only a minimal loss to the family, and the family did not take adequate precautions to protect their roofless house from rain):
- \* Expenses of a mother who slipped on ice while getting her chapter's meeting room key (although she broke her ankle and needed therapy, virtually all expenses were covered by insurance, and transportation/child care could and was provided by family members);
- \* Trip to a member's parent or in-law's funeral;

- \* Funeral expenses for a child who died suddenly and unexpectedly;
- \* Memorial shrine for a child who died;
- \* Request to remember member who died a year before;
- \* Request for being a single mother;
- \* Member's hand cut in window accident (family able to handle expense of surgery);
- \* Son's knee surgery (family able to handle expense);
- \* Unemployed husband;
- \* Divorce asked for grant for lawyer;
- \* Playgroup asked for grant to get themselves counseling after a member's suicide;
- \* Divorce husband tied up money, but alternate avenues available, including garnishing wages, work, family. (Situation difficult, but not impossible);
- \* Children's college fund after father died;
- \* Request to help member care for her parent and sibling who were hurt in car accident;
- \* When the member-in-need has already received a grant.

Each of the above situations was considered individually. Although each situation was very serious, the situations did not qualify for the kind of assistance that the Mother-To-Mother Fund is able to give.

We are not allowed to discuss the specific situations above, but if you need any additional information on the Fund criteria for a situation in your chapter now, please contact your Regional Coordinator.

# International MOMS Club® Mother-To-Mother Fund® Grants January, 1994 – Present

Below are the situations for which grants have been given since the beginning of the International MOMS Club's Mother-To-Mother Fund in 1994, through the date of this publication.

As you'll see, each situation is unique and extremely devastating to the member and/or her family. Each grant request was considered individually and each situation was weighed for severity and the ability of a family to prepare for the situation.

The Fund was originally created to help when natural disasters struck. In 1996, we were able to expand the Fund to also help with devastating personal financial disasters.

We believe you'll see from the situations below, that the Fund has fulfilled its goal of helping MOMS Club members suffering from unexpected and devastating natural and personal disasters.

The amount of money we have been able to give in grants has grown over the years, both in the number of grants and the possible size of each. We hope that the Fund will continue to grow so we can make an even more significant positive impact in the lives of our members-in-need in the future.
